

PolyPro® Wall Straps

DuraVent continually invests in value-engineering efforts that improve upon the existing safe and reliable products we provide our customers. As part of these ongoing efforts we are pleased to introduce enhancements to our PolyPro wall strap. This value-engineered design utilizes a more commonly used 3/8" rivnut which enhances the support strength for the venting and is now featured in our online catalog. The previous design PolyPro wall strap will be available for purchase while inventory remains.

Single-Wall
