

316L Now Available for DuraSeal®

DuraVent has developed a 316L option for the DuraSeal® line, adding another excellent stainless steel choice for highly corrosive environments. 316L has a long-proven record as a venting material and we are pleased to offer this cost effective alternative material.

This expansion of the product offering is available for

Single Wall (DS)

Double Wall (DSD)

Insulated Double Wall (DSID) in sizes 3"-24"

For current pricing and availability, please call customer service at (800) 835-4429.
