PolyPro® single-wall polypropylene venting systems by DuraVent are now approved for use on Modine PTC/BTC Unit Heaters.

Consult the appliance instructions for details.
Please visit www.modinehvac.com.

Benefits of Using PolyPro® vs. Schedule 40 PVC:
- Max flue gas temperatures are 230 degrees (over 50% higher than PVC)
- 0” clearance to combustibles
- No need for glues or primers to connect the vent system together
- Light weight for easy install
