

New, UL Listed, Patent-Pending Pellet Vent Relining for Factory-Built Chimneys

M&G DuraVent is the first manufacturer to have a UL-listed relining system for factory-built chimneys. Our PelletVent Pro relining system can be used for wood, pellet, and biofuel burning appliances. When an insert is installed into an existing factory built chimney or b vent, relining the existing chimney is critical for proper performance and safety.

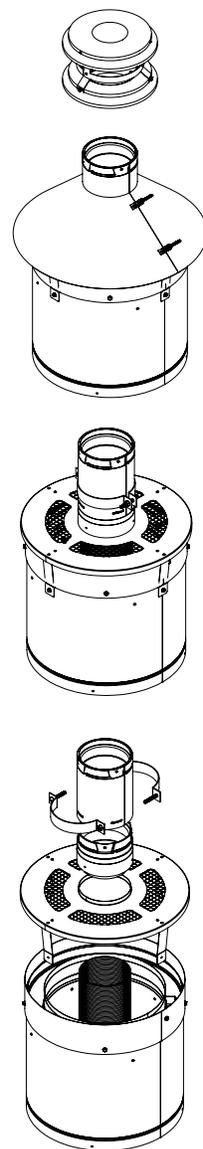

What does the UL listing cover?

- All 127, 103, 103HT chimneys or b vent
- Insulated chimneys- all sizes with 2" clearance
-  Air cooled - clearance based on diameter
- All Pellet approved M&G DuraVent systems
- Flex does not need insulation!!!

Factory-Built Reline Kit includes:

- Vertical Cap
- Storm Collar
- Support Bracket
- Ventilation Disk
- Centering Bracket
- PelletVent Pro 12" Length
- Flex Connector
- Flex Length (20' or 35')
- Adjustable Band
- Flex Adapter

SIZE	PelletVent Pro 304			PelletVent Pro 316
