CHANGING TO HIGH EFFICIENCY? UTILIZE YOUR EXISTING VENT!

FasNSeal 80/90 is a unique, patent pending system that exhausts 90+ condensing appliances with Type B atmospheric units within the same vent.

Using your preexisting common vent, our cap improves the operation of both the remaining atmospheric appliance, and the new condensing unit, while not disturbing finished space during installation.

Finally a solution when you need to deal with narrow lot lines, clearance to window and door openings or when side wall venting just isn’t practical.
