1. Adjust the worm gear clamp so it will fit over the outer diameter of the Gas Vent Pipe. Place the Universal Gas Vent Cap over the pipe so the brackets come in contact with the top of the pipe. Make sure the proper pipe diameter is against the bent part of the brackets. See Figure 1.

**Figure 1**

2. Ensure the Universal Gas Vent Cap is fully seated flush to the top of the Gas Vent male end. Tighten securely the worm gear clamp around the outside of the Gas Vent Pipe. See Figure 2. To remove, loosen up the worm gear clamp and lift the Universal Gas Vent Cap from the Pipe.
