

Square Cathedral Support 24" for DuraTech Premium

Nowadays, more attic insulation is needed to keep Old Man Winter out and the heat in. To help with that, DuraVent has added a 24" tall Square Cathedral Support box to our DuraTech Premium product offering. The increase in height means you can add the necessary insulation to your attic without having to worry about insulation encountering your DuraTech Premium chimney. With its double-wall, all-stainless-steel construction and 2" insulation, DuraTech Premium minimizes heat loss through the chimney walls and provides the safest product for use in today's homes.

SIZE	ORDER #
6"	6DTP-CS24
7"	7DTP-CS24
8"	8DTP-CS24
