

Insulated Reduced Clearance Support for DuraTech[®] Canada

Use with flat, vaulted or cathedral ceilings. Certified to reduce clearance to combustible from the usual 2" (per side) down to a 1" (per side) for all diameters. This allows for a smaller hole to be cut in the ceiling. Can connect to both double-wall stove pipe (DVL) or single-wall stove pipe (DuraBlack) with included adapter. Replaces the Attic Insulation Shield and Finishing Support for an attic installation on a single-story home. Also included is an adjustable black finish trim, square to round collar and insulation.
