

If We Can Put A Man On The Moon, Why Can't You Design A Chimney That Does Not Need Continuous Shields?

WE JUST DID!

Premium Shields are a thing of the PAST with
DuraTech® Canada 1" Chimney

It is no secret.

Dealers & installers across the country really dislike the additional shields required with one-inch insulated chimney systems to meet the ULC-S629 standard.

That is exactly why we have eliminated them.

Our improved chimney design features an all-new revolutionary insulating material that satisfies all Canadian testing protocols without the extra shields.
