

SUBJECT: New DuraTech® Premium and DuraTech® Canada Products

DATE: September 20, 2024

PRODUCT: NEW adjustable Decorative Sleeve; Discontinuation of Decorative Collar

Decorative Sleeve Now Available!

Duravent Group is pleased to introduce our latest innovation for DuraTech Premium and DuraTech Canada product lines - the Decorative Sleeve. Crafted with a metallic black finish, this sleeve provides a clean finish that completes the look of an installation.

Unlike traditional fixed parts our Decorative Sleeve offers versatility with its adjustable design. This sleeve provides a seamless and decorative finish along the horizontal length of chimney in the room when passing through a non-combustible wall or through the Insulated Wall Thimble. The Decorative Sleeve adjusts to cover up to 12" of the chimney providing a finished look for the installation. Additionally, there is no need to trim the Decorative Sleeve as it slides over and overlaps the insulated chimney length which protrudes through the wall. Traditional installations only cover 1" to 5" of chimney.

Decorative Sleeve installation example

Decorative Collar Discontinuation

Beginning September 20th, the Decorative Collar will be phased out and only available while supplies last. The Decorative Sleeve is included in Wall Support and Exterior Installation Kits effective September 5th, replacing DVL & DDW Decorative Collars. The new Decorative Sleeve eliminates the need for the Decorative Collar and provides a more versatile finishing component, as the Decorative Collar could only cover a maximum of 1" of chimney. Duravent Group will continue to honor the limited lifetime warranty. To file a warranty claim, please follow the standard claim procedure on the warranty document.

See the following page for all product numbers affected. Please reach out to your Regional Sales Manager with any questions. Thank you for your continued trust in Duravent Group!

DECORATIVE SLEEVES

The following components are new products available as of September 20, 2024.
