

**SUBJECT:** NEW DuraTech® 5" - 8" US Products Coming March 2024!  
**DATE:** February 2, 2024  
**PRODUCTS:** New Support Boxes with Flue Extension and New Pass-Through Radiation Shield; Discontinuation of Current Support Boxes

### Coming March 2024

Duravent is pleased to announce the launch of product improvements to ceiling supports and the addition of an all-new Radiation Shield. These new products will be available to order in 5", 6", 7" and 8" diameters starting March 1. Pricing and part numbers are available now with the catalog and additional product launch materials coming in February. A cross-reference is provided below.

### Discontinuation March 2024

Beginning March 1st, the current DuraTech US support boxes will be phased out and only available while supplies last. DVL and DuraBlack Chimney adapters will continue to be available.

Duravent Group will continue to honor the limited lifetime warranty. Should you need to file a warranty claim please follow the standard claim procedure on the warranty document.

Thank you for your support through this product transition. Please contact your Regional Sales Manager with any questions or concerns.

### What's New?

Support Boxes have an integrated flue extension. Stovepipe will connect directly to the ceiling support without the need for a separate chimney adapter. See the examples to the right. The discontinued design required an adapter to connect to the Stove Pipe.

Square Ceiling Support Box

Round Ceiling Support

Pass-Through Radiation Shield is used when an insulated chimney passes up through a ceiling.

- Suited for flat, vaulted, or cathedral applications
- An integrated Firestop on bottom
- Top can serve as an Attic Radiation Shield where required.
- Factory insulation and square-to-round collar are included.
- Effective height (length) with standard extension is adjustable from 24" up to a maximum of 36".
