

NEW FasNSeal Fixed Blade Damper Listed and Approved

The purpose of the Fixed Blade Damper is to ensure optimum pressures through an appliance. The Damper will aid in the proper operation and efficiency of the appliance by preventing higher than desired draft readings.

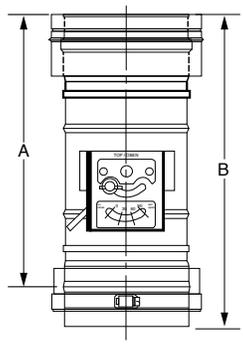

Application

- Install at the breech of the appliance or as close as possible, and secure as instructed.
- Damper can be installed vertically, diagonally and horizontally.
- Includes a fail-safe feature to ensure the damper will be open in the event of a failure.
