

Congratulations on purchasing your DuraVent 4" PelletVent® Pellet Stove Venting Kit!

Rest assured you have made a wise decision to use one of the industry's leading vent systems for your stove.

This kit contains most components for a typical horizontal installation and we have recently improved the kit to include new and improved components. The Horizontal Cap design has improved from a square cap to a round cap design, offering excellent exhaust air venting and a more visually appealing finish.

Square Style Cap

Round Style Cap

Complete up-to-date clearance to combustible information, installation instructions, and warnings are enclosed, or available at www.duravent.com.
