

### DuraVent Redesigns DuraLiner Masonry Thimble with Slip Connector

With continuous commitment to refining existing products to exceed demands of today's market, DuraVent has redesigned its DuraLiner Masonry Thimble with Slip Connector (MTSC) to make installation easier than ever. The new design enables a faster installation by increasing visibility during assembly and no longer requires an adapter to connect to DuraBlack or DVL pipe. This redesign also enables the Masonry Thimble to be drip-free.

Below are the part numbers impacted by this design change:

Order #	Stock #	Description
5DLR-MTSC1	810014030	5" Diameter Masonry Thimble with Slip Con
6DLR-MTSC1	810014031	6" Diameter Masonry Thimble with Slip Con
8DLR-MTSC1	810014032	8" Diameter Masonry Thimble with Slip Con

DuraLiner is a high-temperature, insulated double-wall masonry relining system for use with appliances fueled by gas, pellet, oil, wood, or coal. It safely protects masonry chimneys from the damaging effects of flue product condensation.
