

**3-8" DuraFlex Vertical Cap and Top Plate no longer available
New 3-8" DuraFlex Removable Vertical Cap and Top Plate / Storm Collar
offered instead**

DuraFlex SS storm collar previously included with Vertical Cap will now come welded to Top Plate.
As a result, Top Plate and Storm Collar (DFS-TPSC) and Removable Vertical Cap (DFS-VCRC) finished goods will be offered.

Welding the Storm Collar to the Top Plate ensures that the Storm Collar and Removable Cap stay fastened to the Top plate. Previously, the Vertical Cap and Storm Collar were connected to the assembly with hose clamp connection to chimney flex.

The original Top Plate (DFS-TP) and Vertical Cap (DFS-VC) will be discontinued and no longer offered for 3-8" sizes.
10" and 12" Top Plate (DFS-TP) and Vertical Cap (DFS-VC) will remain unchanged at this time.
